EDUCATION

JOHNS HOPKINS UNIVERSITY

Masters of Science in Engineering Management

Baltimore, United States

05/2027

PUNE INSTITUTE OF COMPUTER TECHNOLOGY

Bachelors of Engineering in Information Technology

Pune, India

05/2022

SKILLS

Technical Skills: Python, SQL, R, C++, Flask, REST APIs, AWS Lambda, Docker, Machine Learning, LLMs, Agentic AI, Vector Embeddings, Audio/Image Processing, Flutter

Product & Business: Roadmap Planning, PRD Writing, Agile, Stakeholder Communication, Go-to-Market Strategy, Competitive Analysis

Data & Analytics: MySQL, Data Pipelines, Data Preprocessing, Statistical Modeling, Predictive Analytics, Excel, Tableau

WORK EXPERIENCE

AI Product Management Intern

CounselAI

Baltimore, United States

December 2025 - Present

- Built AI driven workflows for file scanning, audio processing, and cross file image detection, supporting 3 live pilot projects with lawyers and improving document understanding and response accuracy
- Improved system performance and scalability by implementing parallel AWS Lambda processing and semantic vector based responsiveness scoring, reducing end to end processing time by over 60 percent
- Worked directly with lawyers and founders to define product requirements and validate real world legal use cases, shaping core AI product features in a pre revenue startup

Software Development Engineer

Druva Data Solutions

Pune, India

July 2022 - May 2025

- Led feature efforts addressing 30+ security vulnerabilities using Snyk tool, achieving FedRAMP compliance, enhancing data protection, and enabling federal client acquisition
- Developed large-file download capability in Flask/REST APIs, solving client failures above 3 GB; directly benefited three top-five customers and ensured compliance with enterprise data access needs
- Designed and delivered targeted download functionality, enabling customers to filter backups by size, date, and file name, reducing unnecessary data transfers and cutting average download volume by over 60%
- Developed a custom data download script for a top Fortune 100 customer, enabling secure retrieval of frozen data without using the DDClient tool, which retained the company's largest eDiscovery revenue contributor
- Prioritized and delivered 18 Legalhold Flask API enhancements in collaboration with engineering, cutting down server response times by 25% and enabling 300+ enterprise users to complete compliance tasks 40% faster

Data Analysis Intern

Srivenk Farms

Pune, India

October 2021 - May 2022

- Developed a cross-platform Flutter mobile application with a Python backend, integrating REST APIs and data pipelines for real-time agricultural market data ingestion, preprocessing, and analytics
- Built a demand-driven AI model for predictive pricing and demand forecasting using statistical to optimize selling windows for a 120-ton yield
- Boosted average selling price by 31% from \$0.94/kg to \$1.23/kg, unlocking \$34.8K in incremental revenue and significantly reducing spoilage using AI-driven, data-backed optimization

ACADEMIC PROJECTS

Strategy Consultant (Student)

Trax Retail

Baltimore, MD

October 2025 - Present

- Created a prototype Agentic AI system for Trax Retail that uses shelf images, POS data, and sensor signals to detect out-of-stock items and recommend replenishment, guided by product thinking and go-to-market strategy
- Proposed a multi-signal model combining foot traffic, Shopkick data, and shelf sensors to help identify shelf issues faster and reduce manual work for store staff, using data analysis, system design, and customer workflow understanding

EXTRACURRICULARS

President

Jnana Prabodhini Youth Wing Organization(Kothrud Chapter)
2022

Pune, India

June 2019 - May

- Led a business venture generating \$6,000 in 17 days, donating all proceeds to Jnana Prabodhini's initiatives
- Managed a 27-member team over three years, organizing 17 treks, 4 sports camps, 4 blood drives, and rural development projects helping 400 households access water during droughts
- Ironman 70.3 Bahrain Finisher
